- On 15 October 1947 a fourth blast furnace was put into commission at Huta Pokoj, formerly the Friedenshütte, at Nowy Bytom (Q51/Y47) in Polish Upper Silesia. This is expected to increase daily pig iron production at the foundry by 120 tons.

Comment: the steel production figure for Huta Pokoj during the first six months of 1947 as 134,812 tons.)

- The Non-Ferrous Metal Refinery at Wroclaw (Breslau) processes about 600 tons of metal per month. Production figures will soon increase, however, as Yugoslavia is expected to send scrap metal for processing.
- A grain elevator with 10,000 ton capacity has been put into operation at Kozle (Cosel) (P51/X98), the Polish river port between Opole (Oppeln) (J17) and Raciborz (Ratibor) (Y05), in Polish administered German Upper Silesia. The elevator, which has modern loading and unloading equipment, is expected to play an important part in Odra River transit traffic with Czechoslovakia.
